Joe,

For Mapping of systems under a boil water notice or not operating

A simple XLS file with one column containing IDs for Drinking water systems having either a BWN or as INOP and a second column containing either BWN or INOP as appropriate

BWN would be from the last assessment record having GENLP, LP/LT, RESULTS and any system that has a BWN Start date on any assessment (field 10) with a null in all assessments. Only one record per system.

Systems ID	Status
1234567	BWN
7654321	INOP

After a momentary silence spake

Some Vessel of a more ungainly Make;

"They sneer at me for leaning all awry:

"What! did the Hand then of the Potter shake?"
